Subject ANNUAL MEDICAL TAX

Urgent Return receipt Sign Encrypt

Dear Food Health and Environment Chief Officer, Mr. Chow,

I would like to suggest some of my opinion as follows:

1. 1% ANNUAL MEDICAL TAX ON EACH NET INCOME \$120000. The total income after deduct from personal expense and annual tax is called the net income. ANNUAL MEDICAL TAX is a new tax item for all tax payers.
2. The richers pay more to narrow the wealth gap difference between poor and rich.
3. It is more easier than 3-5% for all before tax.
4. Employers pay it for employees as benifit, can deduct it from profit tax as encouragement.
5. The gov't can provide job vaccancies if shortage of employee to handle the annual medical tax.
6. It saves the money in administration fee to employ medical insurance company to handle medical insurance.
7. For those who brought private medical insurance can be 'transferred' into annual medical tax by gov't discussion with insurers and insurees.
8. An assurance in quality without co-payment on medicine expense with necessary, better, best drugs, surgery, service.... are all welcome even though increasing annual medical tax in good year in the futer after the policy setup.

best regards,
CKY
