Hong Kong's Domestic Health Accounts (DHA)

- A. ESTIMATES OF HEALTH EXPENDITURE: 1989/90 2015/16
- B. WHAT ARE NATIONAL (OR DOMESTIC) HEALTH ACCOUNTS?
- C. DEFINITION OF HEALTH EXPENDITURE
- D. CLASSIFICATION SYSTEM FOR HONG KONG DHA

A. ESTIMATES OF HEALTH EXPENDITURE: 1989/90 – 2015/16

Summary results:

Based on the guidelines of *A System of Health Accounts 2011* (SHA 2011) published collaboratively by the Organisation for Economic Co-operation and Development (OECD), Eurostat and World Health Organization (WHO), the Food and Health Bureau has updated the estimates of health expenditure in Hong Kong to the position of fiscal year 2015/16.

The major trend and pattern in breakdown by financing scheme, provider and function in accordance to SHA 2011 are summarised below.

- (a) Health expenditure ($\underline{\text{Tables } 1.1 1.2}$ and $\underline{\text{Figures } 1.1 1.2}$)
 - 1. Total health expenditure amounted to \$147,597 million in 2015/16, with annual per capita spending at \$20,243.
 - 2. From 1989/90 to 2015/16, total health expenditure rose at an average annual rate of 5.9% in real terms, faster than the corresponding increase of 3.8% in Gross Domestic Product (GDP) during the same period. As a result, total health expenditure as a percentage of GDP went up from 3.6% in 1989/90 to 6.1% in 2015/16.
- (b) Health financing schemes (<u>Tables 2.1 2.4</u> and <u>Figures 2.1 2.5</u>)
 - 1. The increase in total health expenditure from 1989/90 to 2015/16 (342% cumulatively in real terms) was largely driven by the public health expenditure, which soared by 458% cumulatively during the period. This well exceeded the corresponding increase of 264% for private health expenditure.
 - 2. The public share in total health expenditure went up from 40% in 1989/90 to 51% in 2015/16. Public health expenditure as a percentage of GDP increased from 1.5% to 3.1% during the same period.
 - 3. The private share in total health expenditure went down from 60% in 1989/90 to 49% in 2015/16. Yet, private health expenditure as a percentage of GDP grew moderately from 2.2% to 3.0% during the period.
 - 4. Analysed by financing scheme, 50% of the current health expenditure was paid via the government schemes, 35% was by household out-of-pocket payment in 2015/16. Payment via privately purchased insurance schemes and employer-based insurance schemes taken

together accounted for 15% in 2015/16. Over the past decade or so, the share attributed to privately purchased insurance schemes had shown a distinct uptrend.

(c) Health care providers (Tables 3.1 - 3.3 and Figure 3.1)

- 1. Analysed by provider, spending at providers of ambulatory health care and at hospitals taken together persistently accounted for more than 70% of current health expenditure. In 2015/16, the share was 75%.
- 2. However, the trend for health expenditure at providers of ambulatory health care and at hospitals was diverse. Spending at providers of ambulatory health care as a share of current health expenditure had decreased gradually from 42% in 1989/90 to 25% in 2015/16. On the other hand, the faster increase in spending at hospitals led to a rise in the hospital share of current health expenditure from 34% to 50% during the same period.
- 3. Public health expenditure was mostly incurred at hospitals, which accounted for 73% of public current health expenditure in 2015/16. Whereas private health expenditure was mostly incurred at providers of ambulatory health care and hospitals, which accounted for 41% and 27% of private current health expenditure respectively in 2015/16.

(d) Health care functions (Tables 4.1 - 4.5 and Figure 4.1)

- 1. Analysed by health care function, the two largest components of current health expenditure were persistently outpatient curative care (32% 44%) and inpatient curative care (23% 30%) during the period from 1989/90 to 2015/16. In 2015/16, their respective shares stood at 34% and 29%.
- 2. Public current health expenditure was mostly incurred in inpatient curative care and outpatient curative care, with respective shares of 34% and 26% in 2015/16. Private current health expenditure was concentrated in outpatient curative care, inpatient curative care and medical goods with respective shares of 42%, 24% and 18%.

(e) Comparison with other economies (Table 5.1)

- 1. Amongst the places with similar economic development, Hong Kong's healthcare system affords service quality and health outcome that fare well by global standards at relatively low current expenditure on health and public current health expenditures as percentages of GDP (5.9% and 2.9% respectively in 2015/16), indicating cost efficiency and effectiveness.
- 2. The ratio of Hong Kong's public health expenditure to GDP should also be considered in conjunction with her low tax regime. The public health expenditure as a percentage of total tax revenue in Hong Kong is comparable to other economies somewhere in the middle amongst the places with similar economic development.

(f) Further detailed tabulations

1. More detailed cross-tabulations of current health expenditure by financing scheme, provider and function are presented in Tables 6.1 - 6.4.

Public inpatient (1)	35,289		1,24	-	36,537		
Public specialised outpatient	16,179		2,15	-	18,334		
Public primary care/general outpatient	7,916		140	4	8,066		
Private inpatient (1)	3,944 (4)	8,971 (6)	4,179	3,865	190	145	21,294
Private primary care/outpatient (2)	1,769 (5)	18,368	2,952	2,730	349	147	26,316
Dental care	1,178	4,774	182	168	-	43	6,344
Medical goods	664	13,001	-	-	-	-	13,665
Others (including ancillary services and administration)	3,785	292	2,155	4,764	37	7	11,039
Current health expenditure	70,724		70,5	346	141,594		

Notes: - denotes nil

- (1) Includes in-patient curative care, in-patient rehabilitative care, in-patient long-term care (health) and day curative care services.
- (2) Private out-patient includes both specialised and general out-patient.
- (3) Includes expenditure on civil servant and Hospital Authority staff medical benefit.
- (4) Includes subsidised in-patient rehabilitative care and in-patient long-term care (health).
- (5) Includes government subsidies on long-term care services, Influenza Vaccination Subsidy Scheme and Elderly Health Care Voucher Pilot Scheme.
- (6) Includes \$945 million that was spent on in-patient rehabilitative care and in-patient long-term care (health).
- (7) Includes medical benefit not in the form of medical insurance provided by private companies / organisations, but excludes civil servant and Hospital Authority staff medical benefit.

B. WHAT ARE NATIONAL (OR DOMESTIC) HEALTH ACCOUNTS?

Back to Top

National or domestic health accounts (NHA/DHA) are descriptive accounts that describe systematically and accurately the totality of health care expenditure flows in both the public and private sectors.

- NHA/DHA show the amount of funds provided by major sources (e.g. government, firms, households), and how these funds are used in the provision of final services, organised according to the institutional entities providing the services (e.g. hospitals, outpatient clinics, pharmacies, traditional medicine providers) and types of services (e.g. inpatient and outpatient care, dental services, medical research, etc.).
- In technical terms, NHA/DHA are a set of tables in which various aspects of an economy's health expenditure are arrayed. Rigorous and standardised classifications of the types and purposes of all expenditures and of all the actors in the health system are adopted in NHA/DHA. NHA/DHA complement other reporting systems to provide a more complete picture of the performance of the health system. A notable example of how NHA/DHA has been deployed in practice is the World Health Report 2000 on the international comparisons of health systems. A principal goal for developing health accounts is to support health system governance and decision-making as the World Health Report argues and shows.
- On the whole, NHA/DHA provide essential data for health sector planning and management, in the same way the national income accounts and population estimates provide essential data for macroeconomic planning and social service planning respectively.

- Health expenditures are defined as payment for activities with their primary or predominant purpose of improving, maintaining and preventing the deterioration of the health status of persons and mitigating the consequences of ill-health through the application of qualified health knowledge.
- Health includes both the health of individuals as well as of groups of individuals or population. Health expenditure consists of all expenditures or outlays for the following health care activities:
 - Health promotion and prevention
 - Diagnosis, treatment, cure and rehabilitation of illness
 - Caring for persons affected by chronic illness
 - Caring for persons with health-related impairment and disability
 - Palliative care
 - Providing community health programmes
 - Governance and administration of the health system

- Hong Kong's DHA has adopted the International Classification of Health Accounts (ICHA) as set out in *A System of Health Accounts 2011*.
- The ICHA has been designed to be compatible with a number of existing classification schemes and practices in international economic statistics, e.g. national income accounts. In HKDHA, expenditures are classified according to the following four dimensions of analysis:
 - a. Health care financing schemes
 - b. Revenues of health care financing schemes
 - c. Health care providers
 - d. Health care functions

a. Health Care Financing Schemes (HFS)

- Health care financing schemes are structural components of health care financing systems: they are the types of financing arrangements through which people obtain health services. Health care financing schemes include direct payments by households for services and goods and third-party financing arrangements. Third party financing schemes are distinct bodies of rules that govern the mode of participation in the scheme, the basis for entitlement to health services and the rules on raising and then pooling the revenues of the given scheme.
- The classification of health care financing schemes is listed below:

HFS.1	Government schemes and compulsory contributory health care financing
	schemes
HFS.1.1	Government schemes
HFS.1.1.1	Government schemes excluding medical benefits for civil servants and
	Hospital Authority staff
HFS.1.1.2	Medical benefits for civil servants and Hospital Authority staff
HFS.1.2	Compulsory contributory health insurance schemes
HFS.1.3	Compulsory medical savings accounts
HFS.2	Voluntary health care payment schemes
HFS.2.1	Voluntary health insurance schemes
HFS.2.1.1	Employer-based insurance schemes
HFS.2.1.2	Privately purchased insurance schemes
HFS.2.2	Non-profit institutions serving households financing schemes
HFS.2.3	Enterprise financing schemes
HFS.2.3.1	Enterprises (except health care providers) financing schemes
HFS.2.3.2	Health care providers financing schemes
HFS.3	Household out-of-pocket payment
HFS.3.1	Out-of-pocket excluding cost-sharing
HFS.3.2	Cost sharing with third-party payers
HFS.3.2.1	Cost sharing with government schemes and compulsory contributory health
	insurance schemes
HFS.3.2.2	Cost sharing with voluntary insurance schemes
	·

Rest of the world financing schemes

HFS.4

- Revenue is an increase in the funds of a health care financing scheme, through specific contribution mechanisms. The categories of the classification are the particular types of transaction through which the financing schemes obtain their revenues.
- Types of revenues of health care financing schemes are used to identify, classify and measure the
 mix of revenue sources for each financing scheme (for example, social security contributions used
 to fund the purchases by social security schemes and grants to sustain the non-profit organisation
 schemes).
- As financing scheme measures "who manages the health funds" whereas revenue of financing scheme measures "who pays the health funds", the latter is a better measure on the shares of public and private expenditures in the health sector.
- The classification of revenue of health care financing schemes is listed below:

RFS.1	Transfers from government domestic revenue
RFS.1.1	Internal transfers and grants
RFS.1.2	Transfers by government on behalf of specific groups
RFS.1.3	Subsidies
RFS.1.4	Other transfers from government domestic revenue
RFS.2	Transfers distributed by government from non-domestic origin
RFS.3	Social insurance contributions
RFS.3.1	Social insurance contributions from employees
RFS.3.2	Social insurance contributions from employers
RFS.3.3	Social insurance contributions from self-employed
RFS.3.4	Other social insurance contributions
RFS.4	Compulsory prepayment (other than RFS.3)
RFS.4.1	Compulsory prepayment from individuals/households
RFS.4.2	Compulsory prepayment from employers
RFS.4.3	Other compulsory prepaid revenues
RFS.5	Voluntary prepayment
RFS.5.1	Voluntary prepayment from individuals/households
RFS.5.2	Voluntary prepayment from employers
RFS.5.3	Other voluntary prepaid revenues
RFS.6	Other domestic revenues not elsewhere classified
RFS.6.1	Other revenues from households not elsewhere classified
RFS.6.2	Other revenues from corporations not elsewhere classified
RFS.6.3	Other revenues from non-profit institutions serving households not elsewhere classified

Direct transfers from rest of the world

RFS.7

- Health care providers are defined as institutional entities that produce and provide health care goods and services, which benefit individuals, groups of individuals or whole populations.
- Where relevant and practical, health care providers are classified into three broad categories: (i) public sector (e.g. government and statutory bodies), (ii) private sector, and (iii) non-governmental organisations. This categorisation is applied over the basic classification system proposed for providers in SHA 2011, by adding an extra digit.
- Some provider categories, such as private psychiatric hospitals may not be relevant to Hong Kong currently, but are retained to anticipate any possible future developments.
- The classification of health care providers is listed below:

HCP.1.1 General hospitals: public HCP.1.1.2 General hospitals: private HCP.1.1.3 General hospitals: NGO HCP.1.2 Mental health hospitals: public HCP.1.2.1 Mental health hospitals: private HCP.1.2.2 Mental health hospitals: private HCP.1.2.3 Mental health hospitals: private HCP.1.3 Specialised hospitals (other than mental health hospitals): public HCP.1.3.1 Specialised hospitals (other than mental health hospitals): public HCP.1.3.2 Specialised hospitals (other than mental health hospitals): private HCP.1.3.3 Specialised hospitals (other than mental health hospitals): private HCP.1.3.4 Specialised hospitals (other than mental health hospitals): NGO HCP.2 Residential long-term care facilities HCP.2.1.1 Long-term nursing care facilities: public HCP.2.1.2 Long-term nursing care facilities: private HCP.2.1.3 Long-term nursing care facilities: private HCP.2.1.3 Long-term nursing care facilities: NGO Mental health and substance abuse facilities Martal health and substance abuse facilities

HCP.8.1	Households as providers of home health care
HCP.8.2	All other industries as secondary providers of health care
HCP.8.9	Other industries not elsewhere classified

• Health care services can often be provided in a wide range of settings. For example, outpatient treatment of an acute episode of a common infectious disease (such as urinary tract infection) may occur in clinics of speciality hospitals, offices of western medical practitioners or family planning centres. In such cases, the type of service does not coincide with one specific type of provider. Using both the health care functions (HCF) and health care providers (HCP) classification schemes to develop DHA tables adds substantial richness to health expenditure

Rest of the world

HCP.9

information.

- Health care functions are defined as goods and services consumed by final users (i.e. households) with a specific health purpose.
- The first-level categories of the functional classification aim to distribute health consumption according to the type of need of the consumer (e.g. cure, care and prevention). The categories relating to cure, rehabilitation and long-term care are broken down at the second level of classification by a mode-of-provision approach, i.e. inpatient, day care, outpatient and home-based care.
- The classification of health care functions is listed below:-

HCF.1	Curative care
HCF.1.1	Inpatient curative care
HCF.1.1.1	Inpatient curative care (excluding psychiatric care)
HCF.1.1.2	Inpatient psychiatric curative care
HCF.1.2	Day curative care
HCF.1.3	Outpatient curative care
HCF.1.3.1	General outpatient curative care
HCF.1.3.2	Dental outpatient curative care
HCF.1.3.3	Specialised outpatient curative care
HCF.1.3.3.1	Specialised outpatient curative care (excluding accident and emergency)
HCF.1.3.3.2	Accident and emergency
HCF.1.4	Home-based curative care
HCF.2	Rehabilitative care
HCF.2.1	Inpatient rehabilitative care
HCF.2.2	Day rehabilitative care
HCF.2.3	Outpatient rehabilitative care
HCF.2.4	Home-based rehabilitative care
HCF.3	Long-term care (health)
HCF.3 HCF.3.1	Long-term care (health) Inpatient long-term care (health)
HCF.3.1	Inpatient long-term care (health)
HCF.3.1 HCF.3.2	Inpatient long-term care (health) Day long-term care (health)
HCF.3.1 HCF.3.2 HCF.3.3	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health)
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health)
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2 HCF.4.3	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation Medical goods
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2 HCF.4.3	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2 HCF.4.3	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation Medical goods Pharmaceuticals and other medical non-durable goods
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2 HCF.4.3 HCF.5 HCF.5.1	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation Medical goods Pharmaceuticals and other medical non-durable goods Prescribed medicines
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4 HCF.4.1 HCF.4.2 HCF.4.3 HCF.5.1 HCF.5.1.1 HCF.5.1.1	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation Medical goods Pharmaceuticals and other medical non-durable goods Prescribed medicines Over-the-counter medicines
HCF.3.1 HCF.3.2 HCF.3.3 HCF.3.4 HCF.4.1 HCF.4.2 HCF.4.3 HCF.5.1 HCF.5.1.1 HCF.5.1.1 HCF.5.1.2	Inpatient long-term care (health) Day long-term care (health) Outpatient long-term care (health) Home-based long-term care (health) Ancillary services Laboratory services Imaging services Patient transportation Medical goods Pharmaceuticals and other medical non-durable goods Prescribed medicines Over-the-counter medicines Over-the-counter western medicines

HCF.5.2	Therapeutic appliances and other medical goods
HCF.5.2.1	Glasses and other vision products
HCF.5.2.2	Hearing aids
HCF.5.2.3	Other orthopaedic appliances and prosthetics (excluding glasses and hearing aids)
HCF.5.2.9	All other medical durables, including medical technical devices
HCF.6	Preventive care
HCF.6.1	Information, education and counselling programmes
HCF.6.2	Immunisation programmes
HCF.6.3	Early disease detection programmes
HCF.6.4	Healthy condition monitoring programmes
HCF.6.5	Epidemiological surveillance and risk and disease control programmes
HCF.6.6	Preparing for disaster and emergency response programmes
HCF.7	Governance, and health system and financing administration
HCF.7.1	Governance and health system administration
HCF.7.2	Administration of health financing
HCF.9	Other health care services not elsewhere classified
